

MLS

UV POWER SUPPLY SYSTEM

- Designed to get maximum performance from the Maxim cassettes
- Each cabinet can house 3 power supplies –6 per double cabinet
- Can handle all multi-lamp applications

The MLS was designed for maximum printing speeds and competitively priced to deliver a greater return on your investment. With its modular design, the MLS allows the narrow and medium web printer to grow their system with their business.

With every installation, you receive the in-depth technical support from our staff of experienced UV printing specialists on a 24-7 basis. Also UVTechnology can support all your system needs with our full line of aftermarket replacement bulbs and accessories.

EXPANSION

Modular design provides an easy and affordable way to add lamps to existing systems.

SAFETY

The MLS meets current NEC, NFPA, and CE standards with the use of finger safe components and fault protection devices.

USER FRIENDLY

The MLS comes with an intuitive menu-driven interface for system operation and programming.

INCREASED PRODUCTIVITY

An auto cool down feature allows for faster restarts.

HEAT MANAGEMENT

Lamp temperature is regulated by a variable speed blower.

FLEXIBILITY

The optional speed wheel interface allows the MLS to be used with virtually any press and makes integration to the press simple.

CASSETTE SYSTEMS

Compatible with:

- Maxim
- Maxim Cool Cure

MLS

UV POWER SUPPLY SYSTEM

Multiple Power Levels
